Greater space between the strings in the same-stanks.
 The measure of stopping therefrom of the string.

The revenue of the ediration of the string,

4. The evenness of the vibration of the string.

That lies public may see and judge for themselves whether he shows statement let true, I publish a diagram of the old and our styles of planes, or rather the old judge style, which rejects if modern improvements, and the Hallet, Davis & time styles of the control of the control of the control of the control of public accepts the decirion that we are living in an of the con-goal four; and that 100 bet, weigh twice as much as flay goal four; and that 100 bet, weigh twice as much as flay qualiform; and that 100 fm. weign areas kinds of instru-of the rest, and have the realer to draw his own conclusions. The Hallet, Davis of Co. Pianus have a greater length of string than those of any other make in the same sized case.

This is the result of the fourth feature, it being a universally conceded fact that all time is produced by observiou, and that

orseen the follows and digits of moral a norm octave plants is as its strings are shorter. With the above improvement, a sourcer bindle, there it Co. plants is enabled to seed out a other and rather than a seven octave plant of any other The Hallet, Davis & Co. Pienes have a wider space between the strings than thuse of any other make.
